

HF /NFC FABRIC WRISTBAND

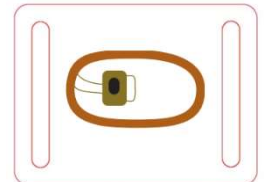

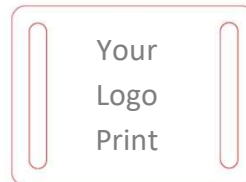

@RFID offers a wide range of RFID transponders. The **NFC Fabric Wristbands** integrates a copper (CU) wired antenna with bonded RFID chip, laminated between four PVC layers for a total thickness of 0.8mm for the Tag. It is then assembled with a high quality fabric and adjustable closing part, optionally for single or a multiple use.

Full 4x4 colours offset print for the Tag and one colour screen print personalization is available, as well as different fabric band colours.
