**ATL-16 ANTI TAMPER
HF/NFC
DRIVING LICENSE
SECURITY LABEL**

**Ø 16 mm
13,56 MHz
ISO14443A**

This HF/NFC ANTI TAMPER SECURITY LABEL could be used by system integrators or endusers for easy automatic identification and marking of ID Cards like driving licenses or similar ID documents.

Enterprises with vehicle fleets like forwarding agents, taxi companies etc. are taking and have the responsibility that drivers of company vehicles carry a valid driving license. The documentation has to be done frequently minimum 2 times a year (the inspection cycle depends on the regulation of the entire country).

The security function to avoid peeling off the label from one ID card to another is given by the mechanical physical anti tamper function: If once glued on an ID card it is not possible to peel off the label without destroying the foil of the label. In addition every NFC label has a unique ID which cannot be altered.

Applications:

- Driving License identification
- ID card identification
- Access Control
- Time Attendance
- Your application

Inside of the label:
